SHADED: FREE Retro Car

Hello, first of all, I want to thank you for downloading this asset. I wrote this message to let you know that you are able to use this model in commercial and non-commercial projects. No attribution is required, but I would feel really honoured if you do so.

These are some important details of the asset:

- All prefabs share the same wheels package. As a result, you will get saved batches.
- For mobile games, I recommend to disable realtime shadows, and use either baked or 'fake' shadows instead.

Feel free to write a review if you want to do so, I read and answer all of them; it really helps me to improve my assets.

With nothing more to say at the moment, I appreciate your time by reading this file.

Best regards, Mena.
